HIGH LEVEL  
FOLDAWAY  
WALL MOUNTED  
ELECTRIC GRILL

by Curtis and Gibson

Inspired by the passion of the British for high level grilling, the hi-GRILL is an innovative and stylish electric grill that, wall mounted at eye level, gives you the ease of use, and visual control to grill exactly as you need. Quick and clean, after use it can be discretely folded away, whilst its elegant and clean design is a stylish enhancement to traditional or contemporary kitchens.

The sheer speed of its heat means that the hi-GRILL is ideal for sealing in the fresh taste of salmon, giving that distinctive finish to grilled steak, or topping off your cr me brulee to perfection. Furthermore, without the need for cooking oils, grilling is the healthy way to make great tasting food.

From the moment of touching the stainless steel handle, through the effortless folding mechanism, and even spread of heat, the hi-GRILL is a shining example of the best of British design, for the most British of pastimes.
